

Farm Safety Starter Kit overview

The Farm Safety Starter Kit is designed to assist in getting your Safety System underway, or improve your existing system.

Getting Started: Complete the Safety checklist and follow with the induction process before moving to the 3 key parts of the Farm Safety Starter Kit.

1. Safety System Snapshot

This tool uses a 'traffic lights' format to guide you and the farm team in checking your Farm Safety System against the current Work Health and Safety Legislation.

2. Earlier Safety Improvements

Think back over the last 2-3 years and make a list of safety improvements you have made on your farm. Some of the improvements may not have been done just for safety reasons, but have improved the workplace from a safety perspective.

3. Quick Safety Scans

This tool contains a set of 30 minute safety scans on the key hazard areas on the farm. This will assist in identifying and fixing the hazards identified. These scans are designed to be used when setting up your safety system and then for ongoing reviews - each scan should be re-done at least once per year.

Please note: The Farm Safety Starter Kit compliments the Employment Starter Kit initiative (ESKI) which contains more information regarding induction. Visit www.thepeopleindairy.org.au/eski for more information.
